

MAKE CLEANING SAFE!

Prevent Fires In Your Solvents . . . Reduce Operator Fatigue

WITH A JUSTRITE

SELF-CLOSING SAFETY RINSE TANK

ADEQUATE CAPACITY — STURDY CONSTRUCTION

Holds 8 gallons of solvent. Large enough to rinse any handcarried part or casting; inside dimensions of tank 24" x 13" x 8 3/4". A drain plug in the bottom of the tank facilitates easy emptying and cleaning. Cover opens wide on sturdy, full width piano hinge to expose maximum area. Foot lever is 3/16" band iron of 1 1/4" width . . . extends completely across front for easy access. Solid end panels and broad base (26 5/8" x 19 3/4") provide stability, prevent tipping and eliminate need for placing the tank in a protected position. Body and frame are made in 18 gauge steel. Tank portion and cover are lead coated (terne plate). All exterior parts are finished in best quality red enamel, baked on.

The automatic cover check has an adjustment screw to adjust the rate of closing to the speed desired.

APPROVED BY FACTORY MUTUAL LABORATORIES

**MODEL 25080
WITH FOOT LEVER**

The safe and convenient way to clean parts and sub-assemblies. Avoids the fire and explosion hazards of exposed flammable liquids. Reduces the toxic hazards of open solvent containers. Automatically closes when foot lever is released.

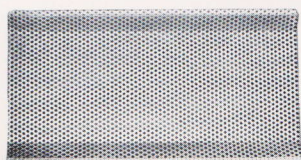

Puts cleaning operations at the right height for operator comfort — ends bending. Permits cleaning to be done close to production machine — saves time and steps. Closes automatically under control of adjustable check device — eliminates hand injuries — eliminates noise. For increased efficiency a Parts Basket and a full size Sediment Screen are available, as accessories, for use with the tank (see below).

MODEL No. 25080 SELF-CLOSING SAFETY RINSE TANK Packed one in shipping carton. Wgt. 50 lbs. List Price Ea.

PARTS BASKET AND SCREEN ACCESSORIES FOR JUSTRITE RINSE TANK

No. 25001

No. 25002

PARTS BASKET

For fast, efficient cleaning of small parts in the rinse tank. Sturdy basket is 20 gauge perforated sheet steel with 1" hand grip on each end. Size 11 1/2" x 15 3/4" x 4" deep. Has 1" legs to keep it above bottom of tank. Can be stored inside tank.

No. 25001 Parts Basket for Rinse Tank List Pr. Each.

SEDIMENT SCREEN

Important for cleaning operations where heavy dirt and oils or metal chips are cleaned off by the solvent. Keeps the solvent clear of these residues. Screen is one piece of 20 gauge perforated sheet steel shaped to fit bottom of tank. Legs allow 3/8" clearance for sediment to collect under screen. Easily dropped in or removed from tank.

No. 25002 Sediment Screen for Rinse Tank List Pr. Each.
